Word Problems

- 1) A certain number was multiplied by 7. 4 was then taken away from the product. Finally, that difference was then divided by 9, resulting in 5. Find the initial number. _____
- 2) First, 33.25 was divided by some number. The resulting quotient was then multiplied by 7. Following this, 5.9 was subtracted from the product, giving 18.6. What was the initial divisor? _____
- 3) 9 was added to a certain number. This sum was then divided by 3. Finally, the quotient was multiplied by 5. This product came out to 5. What was the number? _____
- 4) 72 was divided by some number, then added to 12. Next, this difference was multiplied by 4, which gave a product of 12. Find this number. _____
- 5) Some number was divided by 6. After which, the quotient is added to 11. Next, the sum is multiplied by 6, which resulted in 60. Given this product, find the initial number. _____
- 6) 10.3 was subtracted from a number. Then, that difference was multiplied by 7, after which that result was divided by 2.5. If the result of that division is -7, then what was the initial number? _____
- 7) Some number was divided into 176.9. This quotient was then multiplied by 4, after which the resulting product was added to 10.2. Given this sum totaled to -38.6, find the initial number. _____
- 8) 0.2 was divided into a particular number. This quotient was then multiplied by 7, and 2.8 was taken from that product. If the previous operation resulted in -499.8, find the initial number. _____
- 9) A particular number was divided by 5 and then 6 was taken away from that quotient. Finally, this difference was multiplied by 4. Given the product was -20, what was that number? _____
- 10) 82.4 was divided by a particular number, then 2 was taken from the quotient. Afterwards, this difference was multiplied by 7. Giving a product of -70. Find the particular number. _____

Worksheets for word problems, these words work problems will produce problems that focus on research and work with percentages. These worksheets percentages of word problems are appropriate for the third grade, the fourth grade, the fifth grade, the sixth grade and the second average.
